This worksheet is intended to be used to help family child care providers calculate their net income to determine if they are eligible for the Tier I reimbursement rate for meals and snacks. The worksheet should not be used by providers to fill out their IRS Schedule C tax form. The calculation of yearly net income on the tax forms involves many other business expenses not listed on this worksheet. Note: A monthly net income that results in a negative number (loss) must be reported as \$0.00 on the Household Income Eligibility Application for Day Care Home Provider.

* Time-space percentage: The time-space % is used to determine the business portion of many household expenses. The formula to calculate this number is:

$$\frac{\text{\# hours home is used for business in a week}}{168 \text{ hours in a week}} = \frac{\text{\# square feet home is regularly used for business}}{\text{total \# of square feet in home}} = \text{time-space \%}$$

A provider who works 10 hours a day, 5 days a week would have a time-space % of 30%. Most providers use all of the rooms in their home for their business on a regular basis. A typical provider would therefore have a time-space of around 30-35%.

The All Kids program offers many Illinois children comprehensive healthcare that includes doctors visits, hospital stays, prescription drugs, vision care, dental care and medical devices like eyeglasses and asthma inhalers. Some families pay monthly premiums for the coverage, but rates for middle-income families are significantly lower than they are on the private market. For instance, a family of four that earns between \$50,700 and \$77,112 a year pays a \$40 monthly premium per child, and a \$10 co-pay per physician visit. Fill out the [application](#) today.
